Open your documents as quickly as you are able to. The attribute "Letter", listed in the overview by "When opened", determines whether the default doc is a letter-formatted RTF document or a letter-formatted plain text document. "Ctrl-O", per default, opens the attribute. If you prefer, you can also assign a shortcut key to this task. To do that, click on "New Key", select the desired key combo, and then assign it to the attribute. When the attribute is opened with the help of the shortcut key, the shortcut key will be highlighted and the shortcut key listed in the overview. To quickly access previously opened documents in the "Open Documents", you can click on the shortcut key again. This opens the "Open Documents", in which the last opened document is listed. After opening a file by using the shortcut key, you can assign an icon to the file. To do that, click on the shortcut key assigned to the attribute again, select the icon of the desired file type from the popup menu, and then assign it to the attribute. Wise Doc Manager For Windows

Wise Doc Manager is a software utility that enables you to create hierarchical structures with documents, in order to easily find them later. In a sense, the software is a file manager. A word processor application first, the app is a text editor first. The installation process is a fast and uncomplicated task that doesn't need your attention. An otherwise super-simple and friendly UI invites you to create as many documents as you want and select their level in the hierarchy (same or subordinate level).

Moreover, you can customize the text formatting with standard options like font type and size, emphasize text with Bold, Italic or Underline, apply effects (e.g. strikethrough, all caps, underline, overline), create subscripts or superscripts, as well as create numbered or bulleted lists. Furthermore, you can customize paragraph settings regarding background color, alignment, spacing, line spacing, indents, tabs and text flow, or select or personalize the style for numbered and bulleted lists when it comes to total levels, list type, graphical characters, position, and so on. Style profiles can be put together too. For your convenience, the software supports all the standard text formatting such as bold, italic, underline, overline, super, subscript and superscript. You can also format any text with normal color, hyperlink it, insert tables and edit the format of the latter. By inserting external files as attachments, pictures, hyperlinks, page breaks, horizontal lines, the system date and time, symbols, non-printing characters, and bookmarks, the application will let you work more easily with these entities. With the added option of inserting a page counter, the tool will help you visualize your progress as you write. You can align the table, resize the table cells and even edit their properties. If you choose to split the cells instead, you can even resplit them back together later. Wise Doc Manager key features include saving a copy of any file before you edit it, allowing you to undo the last action, automatically saving any file before you exit the application, there is also the support for encryption and password-protection.
